DETAILED ACTION***Allowable Subject Matter***

Claims 34, 38-43, 46-49, 51-56 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularity or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 34, 40, 46, 47, with the allowable feature being; the second lens unit having, in order from the object side to the image side, a positive lens element, a negative lens element, and a positive lens element(claim 34); the separation between the first lens unit during zooming and the movement of the locus of the first lens unit during zooming from the wideangle end to the telephoto end includes a part which is movement to the object side(claim 40); the first lens unit of negative refractive power, located closer to the object side than any lens units of the zoom lens, the first lens unit having in order from the object side to the image side, a positive lens element, a negative lens element, a negative lens element, and a positive lens element(claim 46); the first lens unit of negative refractive power, located closer to the object side than any lens units of the zoom lens, the first lens unit having four lens elements(claim 47) . Therefore claims 34, 38-43, 46-49, 51-56 are allowed.
